

## 自由主题

1. The other languages team, such as Korean/Japanese/Spanish/Russian
2. 20+ years manufacturing and exporting experience
3. Full set of certificate such as SGS/TUV/ROHS
4. Provide various PVC sheet processing services

## 转化按钮

We will be in a very short period of time to give you a satisfied reply  
Get the latest price now

## PVC types

1. A4 size PVC Sheet For Stationery Cover
2. PVC Grey Board
3. Black Matt And Glossy PVC Rigid Sheet
4. PVC White Rigid Sheet
5. Colourful PVC Rigid Sheet
6. Embossed Matt PVC Transparent Sheet
7. Green PVC Christmas Tree Film
8. Green PVC Fence Film

## 公司展示

1. 场景及设备展示
2. There are more than 10 PVC sheet production lines in our company,our daily capacity is 120 tons per day.We can make different types of PVC sheets,such as glossy PVC sheet;Matt PVC sheet;Transparent PVC sheet;Opaque PVC sheet;Thick PVC sheet and PVC sheet processing service.

## 订购流程图

### Lead time

5-10 days for less than 10tons order quantity,  
10-15 days for 20tons order quantity  
15-20 days for 20-50tons order quantity

1. Send your enquiry
2. Quote price
3. Sample approval
4. Negotiate price and lead time
5. Sign the contract
6. Payment and production
7. Shipment

## Our Service

1. Professional QC system
2. TDS for each batch of goods
3. Quality backtracking system
4. Discount for old customer
5. New products promotion

## Customer review

Vince from Philippines

Cheap price, goods quality and helpful salesman

Mike from USA

Fast delivery, quality is ok, good price

Sumit from India

Stable quality, fast delivery and good service, perfect

Dr. Mohammed Hassan from Saudi Arabia

The products is in good quality, with high transparency, high glossy surface, no crystal points, and strong impact resistance. Good packing condition!

Pter from Belgium

Very helpful salesman, perfect products quality.

Raida from Jordan

The packing is goods, very surprised that we can get such goods products in a very low price.

## FAQ

### What is PVC sheet

The full name of PVC rigid sheet is Polyvinyl Chloride Rigid Sheet. Using amorphous materials as raw materials, it has super high performance in anti-oxidation, anti-strong acid and anti-reduction. PVC rigid sheet also has high strength and excellent stability, and is not flammable, and can resist corrosion caused by climate change. Common PVC rigid sheet includes transparent PVC sheet, white PVC sheet, black PVC sheet, gray PVC sheet, gray PVC board, etc.

### What is the advantage of PVC sheet?

PVC sheet material not only has many advantages such as corrosion resistance, non-flammability, insulation, and oxidation resistance, but also because of its reprocessability and low production cost, so that PVC sheet has always maintained a high sales volume in the plastic sheet market. This is also due to its wide range of uses and affordable prices. The multiple functions of PVC sheet did not increase its value, but it has been occupying a piece of plastic sheet market at a cheap price. At present, our country's improvement of

PVC sheets and design technology have reached the international advanced level.

## What is the usage of PVC sheet/Film?

PVC sheet are extremely versatile, there are different types of PVC sheets, such as thick PVC sheet/thin PVC sheet/clear PVC sheet/black PVC sheet/white PVC sheet/glossy PVC sheet/Matt PVC sheet.

Due to it have good processing properties, low manufacturing costs, corrosion resistance, and insulation. PVC materials have a wide range of uses, mainly used to make: PVC report covers; PVC name cards; PVC curtains; PVC foam board, PVC ceiling, PVC playing card material and PVC rigid sheet for blister. PVC soft film is also used to make all kinds of imitation leather for luggage, sports products, such as basketball, football and rugby. It can also be used to make belts for uniforms and special protective equipment. There are also soft film to make PVC table cover, PVC curtain, PVC bags, PVC packing film.

## What is the disadvantage of PVC sheet ?

PVC sheet is also a kind of plastic that is often used. It is a resin composed of polyvinyl chloride resin, plasticizer and antioxidant, and it is not toxic. However, the main auxiliary materials such as plasticizers and antioxidants are toxic. The plasticizers in daily PVC sheet plastics mainly use dibutyl terephthalate and dioctyl phthalate. These chemicals are toxic, and lead stearate, an antioxidant for PVC, is also toxic. Lead is precipitated when PVC sheets containing lead salt antioxidants come into contact with ethanol, ether and other solvents. Lead-containing PVC sheet is used for food packaging when it encounters fried dough sticks, fried cakes, fried fish, cooked meat products, cakes and snacks, it will cause lead molecules to diffuse into the grease, so PVC sheet plastic bags cannot be used to contain food, especially food containing oil. In addition, polyvinyl chloride plastic products will slowly decompose hydrogen chloride gas at a relatively high temperature, such as about 50°C, which is harmful to the human body. Therefore, polyvinyl chloride products are not suitable for food packaging.

## What is 5 biggest PVC rigid sheet manufacture in China?

Jiangsu Jincai Polymer Materials Science And Technology Co., Ltd.  
Changzhou Huisu Qinye Plastic Group  
Jiangsu Jiujiu Material Technology Co., Ltd.  
Jiangsu Jumai New Material Technology Co., Ltd.  
Yiwu Haida Plastic Industry Co., Ltd.

## What is application of PVC rigid sheet?

Due to good processing properties of PVC sheet, low material costs, PVC sheets have extremely wide range of uses, mainly used to make PVC Christmas Tree Film;PVC Green film to make fence;PVC report covers; PVC name cards;PVC boxes; PVC foam board,PVC ceiling, PVC playing card material and PVC rigid sheet for blister.

## What is the most common thickness of PVC sheet?

This depends on your requirement,we can make it from 0.12MM to 10MM

The most common customer use are

1/2 inch pvc sheet

2mm pvc sheet

4mm pvc sheet

6mm pvc sheet

3mm black pvc sheet

black pvc sheet

white pvc sheet
